-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/17/2006 has been entered.

2. Due to amendments and persuasive arguments by applicant, the previous rejections based on Hanninen et al. have been overcome and are hereby withdrawn.

Claim Rejections - 35 USC § 102/103

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12-17 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Hauber et al. (USPN 4,033,918), Gleichenhagen et al. (USPN 4,413,082), Allbright et al. (USPN 4,492,724), or Czech (DE 4432368), for reason cited in previous actions.

Response to Arguments

6. Applicant's arguments filed 05/17/2006 have been fully considered but they are not persuasive.

7. Contrary to applicant's argument, Gleichenhagen et al., in col. 5, line 49-52, teaches a water-insoluble resin. The resin is not taught to be limited to rosins or even natural resins, these are just examples. The teaching of water-insoluble resins would fully encompass resins, which are conventionally known to contain polymeric material, particular synthetic resin.

8. Regarding Czech, the abstract teaches water-insoluble alkyl (meth)acrylates polymerized by a polymerization initiator in the PSA.

9. Further, Hauber et al. teach both a crosslinked and an uncrosslinked acrylic acid ester copolymer. The dioctylphthalate is a plasticizer.

10. It is noted that no arguments were made against the teaching of Allbright et al.

11. The claims are still not allowable over the prior art and the rejections are maintained.
